Audio Connectors

Wood Dale, IL– March 2010 – Mil-Con, Inc. introduces a new series of Audio Connectors to its product line.

Mil-Con's 5 and 6-pin audio connectors include both filtered and non-filtered versions in a variety of wire and printed circuit board terminations. Mil-Con's innovative engineering has brought new technology to this existing connector segment and has developed many special and custom connector products for higher pin-count, higher density, size-reduced, and custom applications.

Features to note:

- Polarized mating.
- Simple and quick coupling (spring-loaded contacts).
- Offered in filtered and non-filtered versions (Pi and C type configurations).
- Custom designs to meet specific electrical, mechanical, and environmental requirements.
- Meet MIL-DTL-55116 standards.
- Accessories: dust caps available. Backshells: available for 19 and 27 position connectors.

Mil-Con's Audio Connectors are ideal for: **ground based communications, industrial devices, medical instruments, military, airborne, and naval communications, security equipment, and test systems.**

For more information, please contact Mil-Con, Inc. at (630) 595-2366.
