## Battery Connectors

Wood Dale, IL– March 2010 – Mil-Con, Inc. introduces a new series of Battery Connectors to its product line.

Battery connectors are available in traditional plug/socket contact styles, as well as in circular contact designs. Mil-Con designs and manufactures standard and custom battery connectors for both applications and manufactures flex-circuit and cable assemblies involving these connectors. SINGARS 6-pin battery type square flange panel mount connectors (receptacles) are compatible with MIL Batteries; BA5590, BB590, and BB390A/U.

Features to note:

- Available in filtered and non-filtered versions.
- Meet a minimum of 1 meter immersion.
- 6 gold plated pins rated at 10 amps.
- Potted backshells available.
- Custom connectors available.

Mil-Con's Battery Connectors are ideal for: **aerospace, handheld communications, industrial, and military battery coupling.**

For more information, please contact Mil-Con, Inc. at (630) 595-2366.
